

Profile

Team Simoco is one of the World's leading radio communications specialists, providing cutting edge Terrestrial Trunked Radio (TETRA), Private Mobile Radio (PMR), Project 25 (P25) and Digital Mobile Radio (DMR) products, services and advanced systems integration to organisations around the globe.

Team Simoco's global presence in the radio communications arena is founded on a 60 year history of innovation, reliability and flexibility. Based in Derby, UK, Team Simoco develops next-generation radio solutions to work with market leading technologies such as Bluetooth, WiFi, VoIP and DSPs. The company also runs a world-renowned service centre from its offices in Huntingdon, Cambridgeshire, which repairs equipment from current and previous generations of mobile radio.

Team Simoco operates in a growing range of markets around the World, including emergency services, military, public sector, utilities and transport across the UK, Europe, the Middle East, Africa, South America and the Far East.

Corporate Strategy

Our overall aim is for Team Simoco to be synonymous with advanced radio communications, for us to be recognised as a global leader in TETRA, PMR, P25 and DMR solutions, combining next-generation technology with the highest levels of service and value.

Team Simoco continues to develop into new and emerging global markets, and continues to develop products specifically to meet the needs of radio users across different geographical territories and within differing industry sectors.

It is an exciting period for Team Simoco in terms of international expansion, with new offices being established in South America and China, as well as continued growth across Africa and the Middle East – success which is due to the company's commitment to developing customised, localised radio communications solutions.

Team Simoco's radio communications solutions have extended beyond the traditional core markets of emergency services and transport, expanding into exciting new sectors such as the oil and gas industry, the retail sector and aviation industry.

With continued success in traditional markets and further expansion into new and emerging global markets, Team Simoco will continue to develop customised, next-generation digital communications solutions and is well positioned at the forefront of radio communications.

Detail

- **Portable Radios** Conventional and Trunked Portable Radios SRP9120, SRP9130, TSP2000
- **Mobile Radios** Conventional and Trunked Mobile Radios, SRM9005, SRM9010, SRM9020, SRM9022, SRM9030
- **Base Stations** 25 Watt and 100 Watt Base Stations
- **Radio Systems** Xfin Blade Single and Multi site MPT1327 Trunked Radio systems, Terrestrial Trunked Radio (TETRA) Systems, Project 25 (P25) and Digital Mobile Radio (DMR) systems
- **Control Systems** DX4000
- **Solutions** Microwave, Line of sight, Fibre Optic, Land line, Infrared, Confined Space Engineering, Systems Integration
- **Applications** Command & Control, AVLS, Mobile Data, SCADA, Telemetry, Despatching, Personal Information Services, Gateway Solutions
